

AQUILA

THE YACHT

Aquila is the largest yacht to be built in the US since the 1930s. Built by Derecktor with exterior design by Tim Heywood, the majestic 280.9ft / 85.6m Aquila superyacht is the definition of luxury. Refitted in 2016, RWD, Susan Young and the refit magicians at Pendennis have transformed this iconic superyacht into the ultimate dream.

Multi-award winning Aquila offers an exclusive member's club atmosphere, providing an abundance of space, hosting endless possibilities from the moment you step aboard.

With a cruising speed of 15 knots and a maximum speed of 17 knots from her highly efficient engines, she is the perfect combination of performance and luxury.

EXTERIOR DECKS

The expansive exterior spaces have comfortable seating areas to relax and dine. Tim Heywood's majestic exterior boasts both grandeur and endless opportunities to entertain making her the ideal charter yacht for socialising with family and friends.

THE INTERIOR

With interior design by RWD and Susan Young, Aquila boasts cool, calm and contemporary interiors. Icy silvers, dark browns peppered with nickel and clean whites are accented with patterned soft furnishings and tasteful lighting. Inside, the impact made by the spectacular 11.2-metre (36.7ft) 'waterfall' chandelier is both stunning and immediate, cascading down four levels from sun deck to the lower deck scattering light across the interior.
